

# COMPACT

## EMERGENCY STOP & RESET BUTTONS

Murrelektronik's emergency stop and reset buttons with M12 connections can easily be integrated into electronic installations.

These control devices are connected with standard M12 cables (4-, 5- or 8-pole). They are a timesaving solution that eliminates the risk of wiring errors. The port allows you to "Plug & Play" while providing a safety solution for a variety of machines and systems.

### ASSEMBLY IN THREE EASY STEPS

1

ATTACH THE  
METAL CLIP

2

SNAP ON THE  
HOUSING

3

CONNECT  
THE M12

WITH M12  
CONNECTION

#### 42mm MODELS

- Compact design
- Ideal for connecting to standard aluminum profiles (40 mm)
- Possible to combine two control devices, such as e-stop and reset button

#### 72mm MODELS

- Established standard housing for emergency stop buttons
- Optional light ring
- Protected model to prevent accidental triggering
